Introduction

MyceliumTent Research

Wotagarden Research

Meeting Report

## 1 Planned Agenda Items

- Selection of project ideas
- Organizational chart and distribution of roles
- Project plan
- Next steps
- Open questions

## 2 Discussed, Feedback, Decisions

### 2.1 Selection of Project Ideas

Wotagarden presents a new construction area on water. It can be used by private, as well as public users for many different purposes, e.g., sunbathing.

MyceliumTent is a solution for a part of the big amounts of waste produced at festivals. It is a product made from mushroom powder, used by young festival-goers and campers seeking a cheap, easy-to-use, and sustainable place to sleep.

### 2.2 Organizational Chart and Distribution of Roles

The organizational chart and included tasks for each role were explained.

### 2.3 Project Plan

The format and functionality of the project plan were briefly described.

### 2.4 Next Steps

The next steps and the allocation of the roles should be discussed in the team and are not a part of the review meeting.

### 2.5 Questions

Question about the professional background of each member of the team.

### 2.6 Feedback

- All of the team members present well and confidently.
- The project plan is well constructed.
- Feedback for the Review 1 Document will be sent to our team by Anna Christen after the meeting.
- The invitation to the meeting should only be sent via email, not Microsoft Teams.

### 2.7 Decisions

Christen Anna and Rohrer Julia both agree that the MyceliumTent should be pursued.

### 3 Agenda Items for Next Meeting

- Final user scenario
- Feedback to potential customers
- Requirement specifications
