2.11 Your suggestions for improving the tutorials

Two answers were given:

- “For me the tutorials are quite good as they are”
- “If the maths script excercises were in the correct order with the lectures, the flow would be better because then there is no confusion as to what was done in class and what not. Saves the tutor time because he doesn't have to filter through all the exercises to find the ones to the relevant topic. Tutoring has been very helpful and the tutor is very organised and put lots of time and effort into creating new exercise sheets for our class which were very helpful.”
